Interior Architectural Signage

HID System Fundamentals

Increase The Clarity of Wayfinding

The timeless design and style of our "HID" Interior Sign System enables end users to direct, inform, reinforce brand identity and image throughout their facility. This modular design allows for future growth and provides the flexibility to easily change copy and graphics using paper inserts.

We offer a multitude of sign configurations including, but not limited to; flat, radius, landscape or portrait styles, directories, suspended or projection designs. Standard end caps are simulated aluminum, however other materials such as wood and marbled acrylic are also available.

HID Sign Systems are manufactured with a standard anodized aluminum finish, but are available in any color of choice to match your interior, brand identity and logo.

Our HID Paper Insert Sign System allows for quick and easy message changes; simply remove non-glare lens with provided suction cup and replace paper insert below.

HID Flat Profile

Contemporary Flat Design

Consisting of 75% recycled material alloy aluminum extruded frames, non-glare lenses having ADA compliant tactile and Grade 2 Braille capabilities along with easily changed paper graphic inserts, the HID Interior Sign System offers an attractive, comprehensive solution for all interior identification/wayfinding projects.

Designed with modularity and expandability in mind, our interior signs can be customized to fit the current needs of your client's facility and also accommodate future growth and changes. Our interior systems are user-serviceable, allowing copy and graphics to be updated by changing paper inserts.

Interior Architectural Signage

HID Radius Profile

Classic Curved Appeal

The innovative design of our HID frame extrusion allows for the choice of either a flat or radius profile signage. Like our flat profile signs, the HID radius profile signs are available in wall mount, projection mount, ceiling suspension mount and free standing versions.

Both of our HID flat and radius can be made ADA compliant with the addition of tactile copy and Grade 2 Braille. They also can be adorned with a number of accessories such as dividers strips, acrylic accents, custom sliders and much more. See page 18-19 for details.

HID Projection Mount

Get Your Sign Message Seen

Our HID projection mount signage system is perfect for messages needing to be seen from afar. Easily read from down hallways and corridors, these projection mount signs are perfect for wayfinding and identification applications.

As with the other HID signage systems, our projection mount signs can be customized to complement any building's interior environment by customizing the paper inserts and end cap colors, in addition to adding custom accents.

HID paper insert projection mount signs prominently display wayfinding messages while adding aesthetic value to interior surroundings.

HID Ceiling Mount

Ceiling Suspension Signage

The HID System suspended ceiling mount signs provide maximum visibility in large hallways and open foyer areas while adding aesthetic value to all interior surroundings.

The HID System suspended ceiling mount signs are also easily installed with minimal tools and labor. The height of suspended ceiling mount signs can be modified simply by adjusting the length of the stainless steel mounting cables, making them a perfect fit for all types of building architecture and clearance requirements.

HID paper insert ceiling suspension mount signs provide maximum visual impact throughout corridors, hallways and open foyers.

Perfect Complements to Any Sign

One of the many attributes of our Interior Signage is the ability to combine multiple elements to create a variety of unique signage offerings. HID accessories include: acrylic message sliders, acrylic paper insert pockets, Quick-grip paper display holders, acrylic accent materials having printed vinyl graphics, desktop display configurations, as well as dry erase, cork board and magnetic surface material options. These enhanced HID sign systems offer niche sign solutions for a variety of clientele.

Add a customized acrylic message slider to an HID sign system to create an interactive, communicative room identification sign.

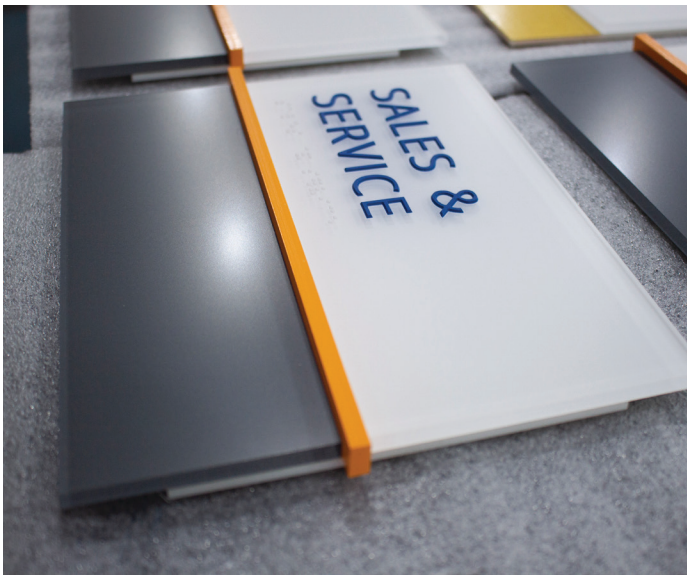
Interior Architectural Signage

Modern Acrylic Signage



Thinking Outside the Frame

In addition to our HID Sign System, we offer a wide variety of acrylic interior signage. Choose from our abundant laser engravable substrate options; customize signs to correlate directly with interior decor and motifs.

With acrylic interior signs the sign design possibilities are truly endless. Custom shaped signs can be created with our advanced laser technology and then adorned with a number of different visual accents. Acrylic signs can also be made ADA compliant to meet building code requirements.

Work with one of our representatives to design a custom acrylic look that suits your needs or see our Acrylic Signage Series located on pages 28 – 39. These series were designed to simplify the design and ordering process for small to large interior signage projects. Ordering acrylic interior signage has never been so easy!

Create distinctive interior signs using our vast offerings of colored substrates and multiple mounting methods.

Endless Possibilities

a.

Create Stunning Acrylic Interior Signage

Our in-house interior sign department is fully equipped with multiple lasers and engraving machines to produce the most eye-catching interior signage designs. With our ADA experts, there is no sacrificing design for ADA compliancy.

Choose from multiple signage design techniques and substrates:

- Clear, frosted, tinted and solid colored acrylic
- Solvent inkjet printed patterns and custom graphics
- Custom shapes and sizes
- Layer substrates to create unique looks
- Mix and match substrates for added allure
- Incorporate facility logos and branding themes
- Intermingle interior decor colors and themes

Signage for the Healthcare Environment

With life expectancy numbers on the rise, so is the demand for quality healthcare. Our Patient Focused signage helps provide such care by enhancing hospital staff communication and reducing safety risks with custom communicative icons. We offer ADA compliant room identification signage that unites vital patient information as well as Isolation and Precaution Inserts.

Like our other interior signage lines, our Patient Focused signage can be customized to any facility's requirements and preferences. Choose from our extruded aluminum frame or acrylic Patient Focused signage options.

Signs of Appreciation

Our line of Donor Recognition Signage offers unlimited design possibilities using a wide variety of substrates and hardware. Optional simulated brass and stainless steel accents create a classic, sophisticated complement to any donor sign. Assist your customers in attracting new donors by providing the best in Donor Recognition Signage.

Endless Design Options

Choose from a multitude of signage configurations. Create signs with a dual purpose; add donor accents to our HID sign system, (pictured on left) by incorporating a donor segment within an ADA Compliant Room Identification Sign to meet ADA Accessibility Guidelines while featuring the donating party. Additional Donor Recognition Sign designs include: laser-etched acrylic panels adorned with standoffs, laser-etched marbled acrylic with paint filled accents, laser-etched specialty acrylic and much more.

Signage Applications

Interior Lobby Signage

Alluring interior lobby signage connects with and informs visitors, leaving a lasting, positive first impression. These signs also reinforce the facility's brand and beautify waiting areas.
